Description	Qty	Rate	Total
2007+ XL883 120+hp 1275 Conversion, sans air cleaner and exhaust			
Black 3.596 Cylinder, 04 Later	2	143.95	287.90T
HP 3600 30D 3.600 30 Degree .500 Dome Piston	2	154.975	309.95T
Cometic 07-up top end gasket kit with .030 3.625 head gasket	1	102.10	102.10T
Hone cylinder and fit piston (each)	2	45.00	90.00T
XL/Buell 1275 kit, Black, 04- Later XL/ Buell The above engine kit has black big fin cylinders included (correct fin style for 2004-up bikes). The cylinders are also available in silver or black highlighted, same price. The above also includes the optional upgrade to a Cometic EST full top end gasket set, which is recommended. Without this upgrade, the kit comes with head and base gaskets only and sells for \$749.95			789.95
Gap Rings and Assemble into Pistons This is our optional preassembly service. We precision gap your rings using our high-end gapping machine which does a perfect job every time, and then we assemble the pistons and rings into the cylinders and ship them in sealed plastic bags, ready for installation. This service greatly simplifies installation and eliminates the need for any special tools on your end.	1	40.00	40.00T

Sample 2007+ XL883/1275 Conversion

			Project
Description	Qty	Rate	Total
XL's use a steel oil pump drive gear that becomes failure prone at higher power levels, and when it fails, it's really ugly. This was an especially bad problem with Buells due to their higher power levels, and HD finally came out with this bronze drive gear in 2006 to solve the problem, but they never put it in XL's. It's a nice upgrade when hopping up an XL, especially if you're in the cam box for a cam swap anyway, and it's cheap insurance against a catastrophic failure. The locking tool listed is necessary for proper installation.			
Cyco sportster cam cover gasket This high quality gasket is rubber-coated steel construction	1	5.50	5.50T
04/Buell XB Intake Pushrod 10.676x.065x3/8 (-.050)	2	14.875	29.75T
04/Buell XB Exhaust Pushrod 10.730x.065x3/8 (-.050)	2	14.875	29.75T
Corrections to the valvetrain geometry that we'll make as a part of setting up your heads for the cams above, in combination with the thinner gaskets used to create a tighter squish clearance, create the need for somewhat shorter pushrods. These are high quality .065" wall heat treated chrome moly pushrods with Mae West ends. You cannot buy a finer pushrod.			
S&S 1.725 ratio Roller Rocker Arms, set of 4	1	534.95	534.95T
Rocker Shaft Set	1	33.95	33.95T
Roller rockers are normally used at this valve lift to reduce side loading on the valve. We also use a high ratio rocker to achieve more lift without causing additional clearance issues in the cam box. Rocker shafts are recommended because they are a high wear item.

Description	Qty	Rate	Total
<p>The Dynojet Powervision is the cat's meow for EFI tuners. This is a flash type tuner that can be left on the bike or taken off after programming the factory ECM. If left on the bike, it can be used for diagnostics, as gauges, or for autotuning the fuel delivery. We can provide a good starting point map from which you can autotune to dial it in for your specific combination. The autotune function works with your stock narrow-band oxygen sensors and does a good job through the meat of the riding range. To tune the high rpm & high load areas of the map, we recommend the optional add-on Autone Pro kit, which includes wideband oxygen sensors and an interface to make them work with the Powervision. It sells for \$420.95.</p> <p>Note that there's a different version of the Powervision for 2014+ Sportsters. It's the same price however. We'll include the correct version based on the year of your bike.</p>
